

TOE PAD FOR BALLET DANCERS

ABSTRACT OF THE DISCLOSURE

A reversible toe pad used by dancers comprising a pad material and a bonded seamless fabric material. A fabric is bonded to the surface of a padding material on one side so as to form a reversible toe pad. The toe pad may be reversed so that the padding material is placed adjacent the dancer's toes or the fabric material is placed adjacent the dancer's toes, depending upon the dancer's preference. The padding material may be a gel or foam. A molding process utilizing a female mold and a male mold may be used.
